

General Purpose Mobile Industrial Laser

NEW

GP 200

LaserClean
For high quality printing

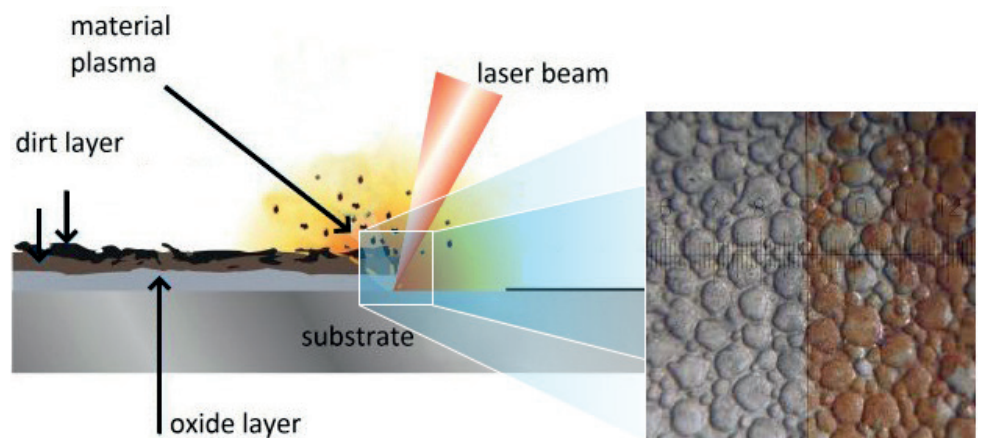

The **GP 200** is a **general purpose mobile industrial laser system** that has many applications and advantages. Our innovative **laser technology** uses laser light that removes all types of dirt and residues.

The system can be used for rust removal on metal surfaces, paint stripping, pretreatment for welding or spraying, stone surface cleaning, rubber mold residue cleaning, and cleaning of oil, stains and dirt in **many industrial processes**.

Excellent and fast operation, ease of use, light maintenance and reliable technology make for a **cost effective industrial solution**.

Advantages:

- ✓ Removes all types of dirt and residues
- ✓ No use of water, chemicals or granulates
- ✓ Handheld and mobile machine
- ✓ Most environment friendly method
- ✓ Fast and clean operation
- ✓ Cable length 5m
- ✓ Combination with robotic arm possible
